Numberland Adventures: Up to 999

Explorer's Pathway

Topic 1

Numbers upto 999

Adventure Begins!

Taleemabad's library is 999 days old.

1. Can you see any big numbers?
2. Can you think of a place where you have seen such numbers?
3. Can you guess how many books there are?

Leap and Learn

How do numbers help us in our daily life?

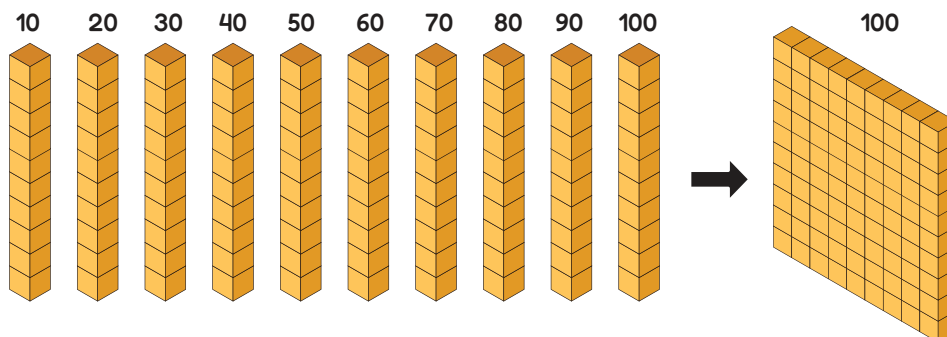

Let's learn about these big numbers on spin the wheel.

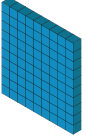

These are called 3-digit numbers.

Every 3-digit number is made up of hundreds, tens and ones.

10 tens make 1 hundred block.

123

Hundreds	Tens	Ones
		

123 = 1 hundreds, 2 tens and 3 ones

In expanded form, $123 = 100 + 20 + 3$

The **digit 1** in 123 is in the **hundreds place**.

The **digit 2** in 123 is in the **tens place**.

The **digit 3** in 123 is in the **ones place**.

The **value** of 1 in 123 is **100**.

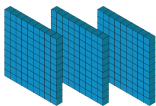

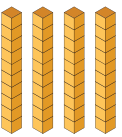

The **value** of 2 in 123 is **20**.

The **value** of 3 in 123 is **3**.

Can you count forward from 123 to 126?

342

Hundreds	Tens	Ones
		

342 = 3 hundreds, 4 tens and 2 ones

In expanded form, $342 = 300 + 40 + 2$

The **digit 3** in 342 is in the **hundreds place**.

The **digit 4** in 342 is in the **tens place**.

The **digit 2** in 342 is in **ones place**.

The **value** of 3 in 342 is **300**.

The **value** of 4 in 342 is **40**.

The **value** of 2 in 342 is **2**.

Can you count backwards from 342 to 337? 342, 341, 340, 339, 338, 337.

Practice Questions

602

Hundreds	Tens	Ones

602 = _____ hundreds, _____ tens and _____ ones

In expanded form, 602 = _____ + _____ + _____

The digit 6 in 602 is in _____ place.

The digit 0 in 602 is in _____ place.

The digit 2 in 602 is in _____ place.

The value of 6 in 602 is _____.

The value of 0 in 602 is _____.

The value of 2 in 602 is _____.

Count backwards from 602, _____, _____, _____, 598.

Count forward from 602, _____, _____, _____, 606,

Numbers are not just digits; they have names too! Let's learn how to say and write them.

The single digits are named:

Numbers from 11 to 19 are called teen numbers.

When we say these numbers, we can hear 'teen' in

most of them: thirteen, fourteen, fifteen, sixteen, seventeen, eighteen, nineteen. Even though eleven and twelve sound different, they are also teen numbers because they come between 10 and 20.

The table shows **4 tens and 5 ones**. Now, let's write this number in words.

45

The number 4 in the tens place is written as '**Forty**', and the number 5 in the ones place is written as '**Five**'. Together, they make '**Forty-Five**'.

Tens	Ones

For tens numbers (20-90), numbers in the tens place end with 'ty'.

20

Twen-ty

30

Thir-ty

40

For-ty

50

Fif-ty

60

Six-ty

70

Seven-ty

80

Eigh-ty

90

Nine-ty

To read a two-digit number, read the tens number first and then read the ones number.

20 + 5

25 = Twenty-five

80 + 3

83 = Eighty-three

50

50 = Fifty

Practice Questions

Let's see how much we remember the number names.

72 =	27 =	90 =
13 =	38 =	

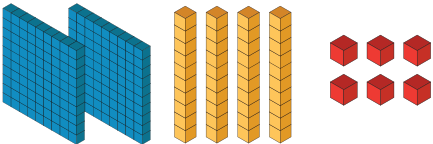

Discovery Playground

Guess the number! 

Work with your partner to draw OR make each number using coloured paper.

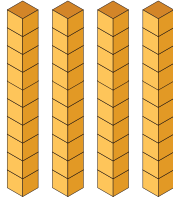

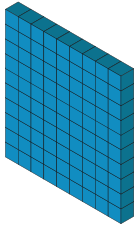

The first one has been done for you.

	246
	$300 + 10 + 2$
	209
	7 hundreds + 1 ten + 3 ones
	470

Skill Sharpener

1. Which number is it?

Answer

2. What is the value of the underlined digit? Tick the correct box.

a. **6**27

☐

20

☐

200

☐

70

b. **8**69

☐

8

☐

80

☐

800

c. **1**99

☐

9

☐

90

☐

100

3. a. Which number is correctly written in expanded form?

Tick the correct box.

612

600+20+2

600+10+2

60+20+2

3. b. Which number correctly shows the number in a 3-digit form?

Tick the correct box.

900+0+2

920

922

209

902

4. Write these numbers in words

a. 53

b. 25

c. 19

d. 73

5. Count forward and fill in the blanks.

a. 482, _____, _____, _____, 486, _____

b. 498, _____, _____, 501, _____, _____

6. Count backwards and fill in the blanks.

a. 823, _____, _____, _____, 819, _____

b. 628, _____, 626, _____, _____, _____

7. Write these numbers in expanded form.

a. 704

b. 385

c. 980

d. 341

8. What is the value of 5 in 527?

9. Which digit is in tens place in 108?

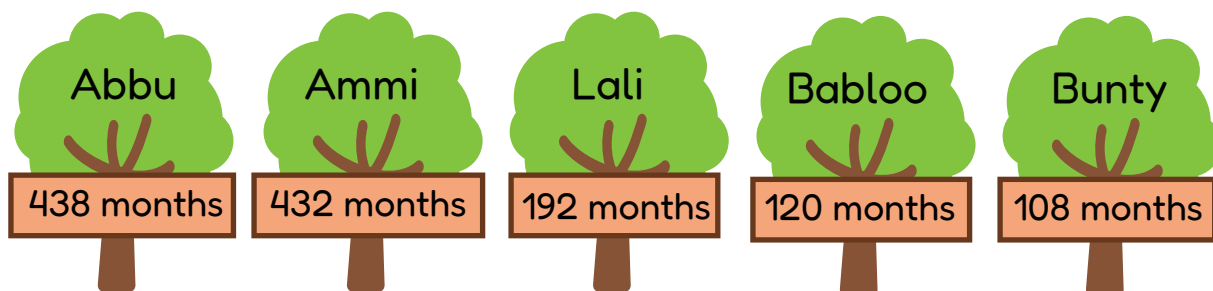

Topic 2

Comparing and Ordering

Adventure begins!

Bunty's family has a tradition of planting a tree when a family member is born.

1. How many months old is Babloo's tree?
2. Which tree among Ammi, Abbu, and Lali is the youngest?
3. Which tree is the oldest and which one is the youngest?

Leap and Learn

When we compare numbers, we can use symbols as well.

Bunty and Babloo decide to first compare Ammi's and Abbu's trees. Ammi's tree is 432 months and Abbu's tree is 438 months.

432 = 4 hundreds, 3 tens, and 2 ones

438 = 4 hundreds, 3 tens, and 8 ones

We start **comparing** from the **greater place value**.

Hundreds	Tens	Ones
4	3	2
4	3	8

4 hundreds = 4 hundreds, we move to the tens place.

3 tens = 3 tens, we move to the ones place.

8 ones are **greater than** 2 ones.

438 is greater than 432.

$$438 > 432$$

Now, let's compare Lali and Babloo's trees.

Hundreds	Tens	Ones
1	9	2
1	2	0

Numberland Adventures: Up to 999

192 = 1 hundred, 9 tens and 2 ones

120 = 1 hundred, 2 tens and 0 ones

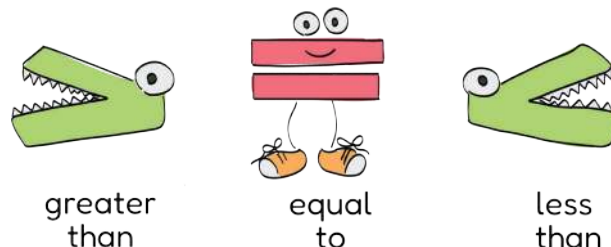

We start comparing from the greater place value.

1 hundred = 1 hundred, we move to the tens place.

2 tens is less than 9 tens.

120 is less than 192.

$120 < 192$

Did you notice that the crocodile mouth is ALWAYS open towards the bigger number!

Practice Questions

Let's compare a few numbers using these symbols.

a. 738 379

b. 482 482

c. 648 846

d. 356 567

e. 256 267

Let's arrange numbers from smallest to largest.

Look at hundreds place first:

108, 120, 192 have 1 in hundreds 432, 438 have 4 in hundreds

For numbers with same hundreds (108, 120, 192):

Compare tens: 0, 2, 9

So: 108 is smallest (0 tens)

Then 120 (2 tens)

Then 192 (9 tens)

Hundreds	Tens	Ones
1	0	8
1	2	0
1	9	2
4	3	2
4	3	8

Then numbers with 4 hundreds:

Both have 3 tens

Compare ones: 2 and 8

So: 432 then 438

Numbers in ascending order: 108, 120, 192, 432, 438

Practice Questions

Now, arrange the above numbers in descending order.

Descending numbers means arranging numbers from the largest to the smallest numbers.

_____, _____, _____, _____, _____.

Discovery Playground

Work with your partner and do the following: 

1. Make the largest possible 3-digit number using the numbers in the basket.

--	--	--

2. Make the smallest possible 3-digit number using the numbers in the basket.

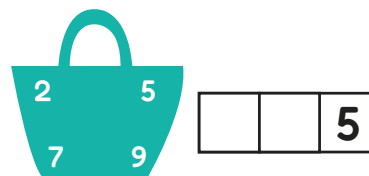

--	--	--

3. Make a 3-digit number starting with 4.

4		
---	--	--

4. Make a 3-digit number ending with 5.

5. Now, let's arrange these numbers from smallest to the largest:
123, 342, 258, 240, 446.

_____, _____, _____, _____,

Skill Sharpener

1. Use the symbols $>$, $<$, and $=$ to compare these numbers.

a. 246 185

b. 507 507

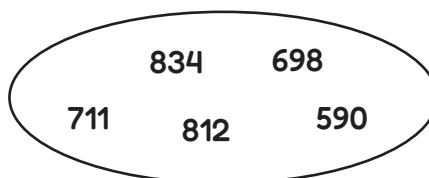

c. 739 458

d. 625 831

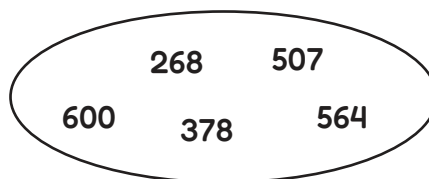

e. 362 824

f. 169 167

2. a. Circle the numbers that are greater than 705.

b. Circle the numbers that are less than 512.

3. Order these numbers in ascending order.

a. 528, 125, 771, 795

b. 217, 681, 238, 531

4. Order these numbers in descending order.

a. 830, 650, 717, 465

b. 505, 735, 718, 773

5. Put these numbers in order starting from the smallest.

444	404	440	414	441	144
-----	-----	-----	-----	-----	-----

6. Use symbols to compare these numbers.

- | | | | | | |
|--------|----------------------|-----|--------|----------------------|-----|
| a. 675 | <input type="text"/> | 657 | b. 611 | <input type="text"/> | 590 |
| c. 156 | <input type="text"/> | 266 | d. 500 | <input type="text"/> | 500 |
| e. 257 | <input type="text"/> | 157 | f. 180 | <input type="text"/> | 210 |

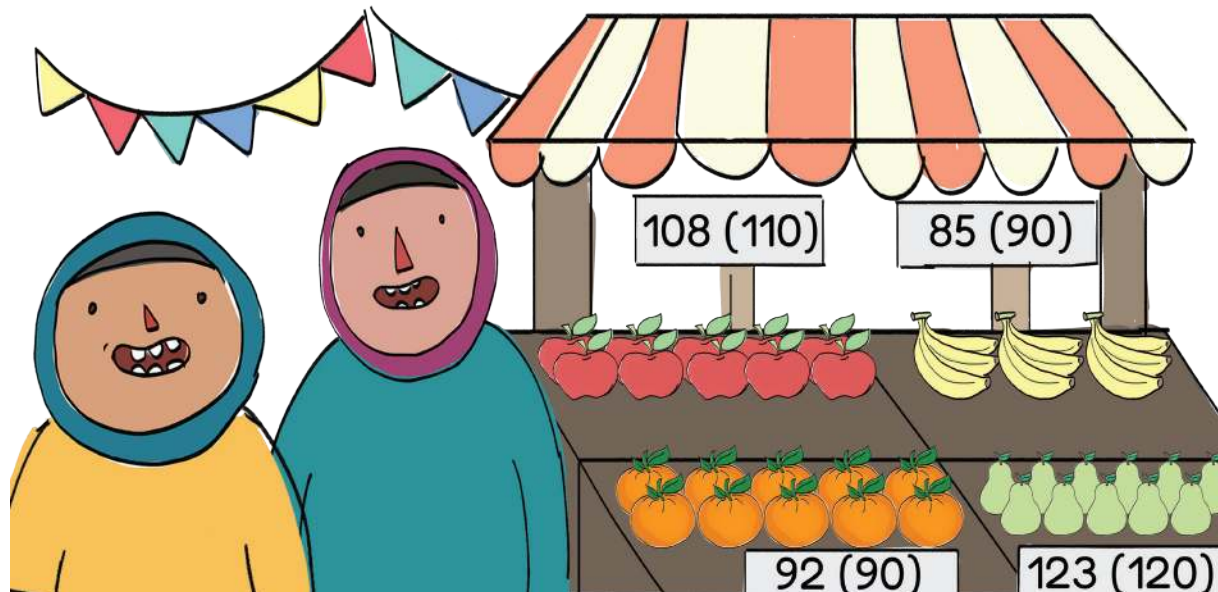

Topic 3 Rounding Off

Adventure Begins!

The shopkeeper has written down the number of fruits.

1. Can you guess why there are two numbers on each basket?
2. What is different about both numbers?

Leap and Learn

The number in the brackets is the rounded-off number.

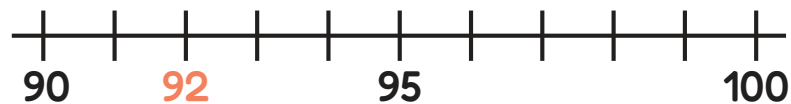

Rounding off means a number is made simple but close to the actual number.

Let me show you how we can round off a number to the nearest ten.

We will use a number line to learn to round off.

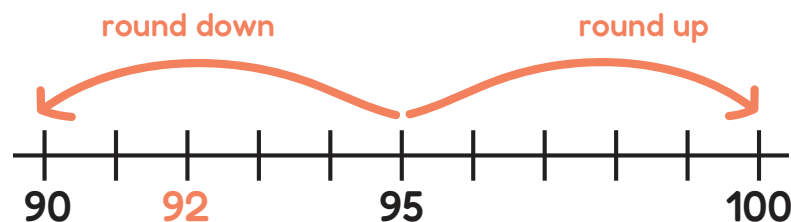

1. Basket of oranges = **92**
92 is between 90 and 100.

When we **round off a number to its nearest ten**, we look at the **ones digit**.

If the **ones digit is less than five**, we have to **round down**.

If the **ones digit is five or more**, we have to **round up**.

The ones digit in 92 is 2.

2 is less than five, so we round down.

Numberland Adventures: Up to 999

92 rounded to the nearest ten is 90.

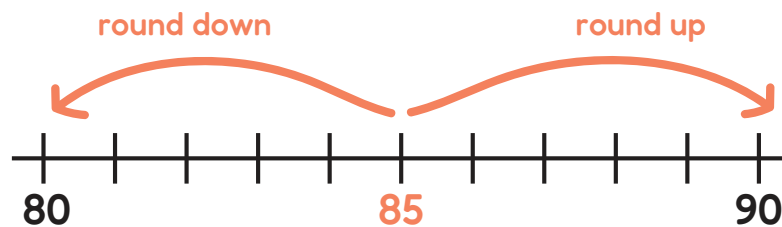

2. Basket of bananas = 85

85 is between 80 and 90.

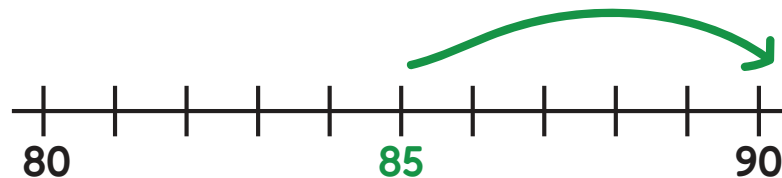

If the **ones digit** is **less than five**, we have to **round down**.

If the **ones digit** is **five or more**, we have to **round up**.

The ones digit in 85 is 5.

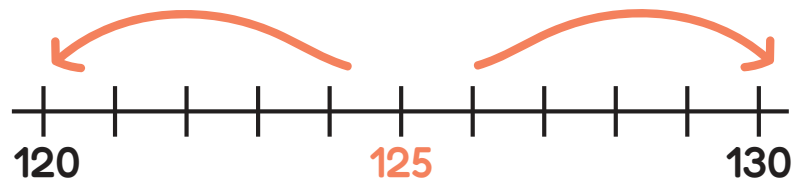

We round up when we have five or more in ones place.

Practice Questions

3. Let's round off the basket of pears = 123

123 is between _____ and _____.

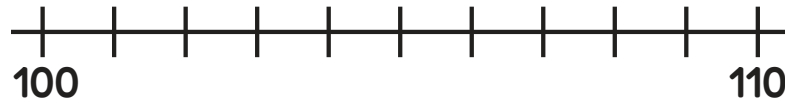

The ones place in 123 is _____.

Will we round up or round down? _____

123 to the nearest ten is _____.

4. Let's round off the basket of apples = 108.

108 is between _____ and _____.

The ones place in 108 is _____.

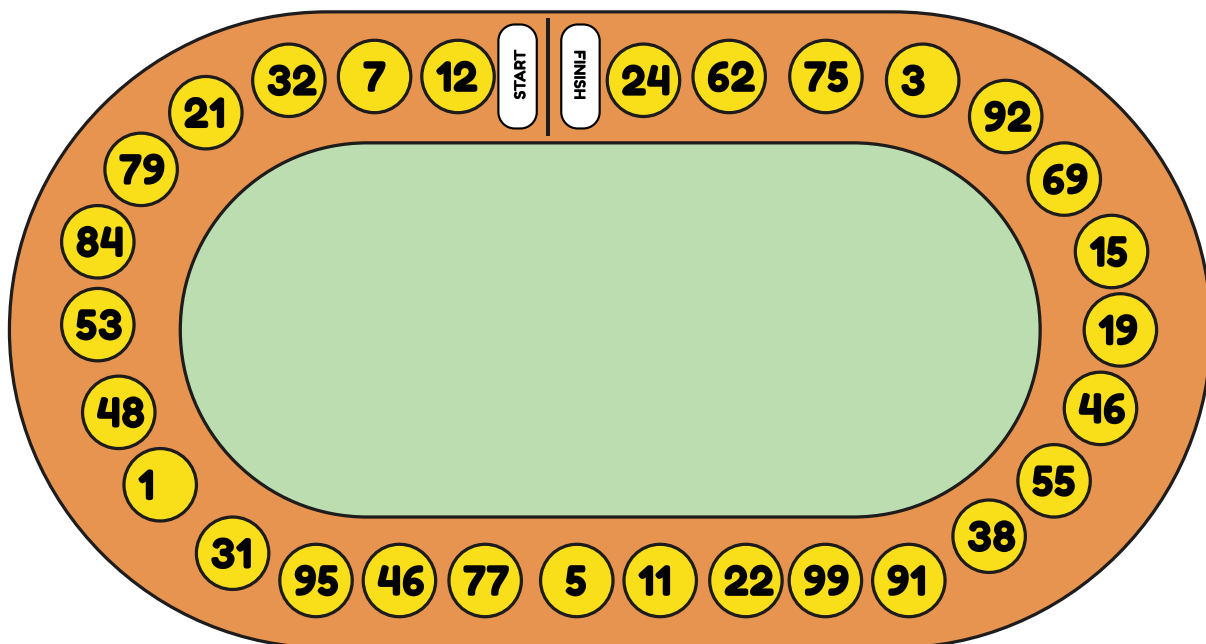

Will we round up or round down? _____

108 to the nearest ten is _____.

Discovery Playground

- Pair up and work with your partner. 
- Take turns to complete the race from START to FINISH.
- Round off each number to the nearest 10.
- The team that finishes the race first and correctly wins!

Skill Sharpener

1. Round each number to the nearest ten by using the number line.

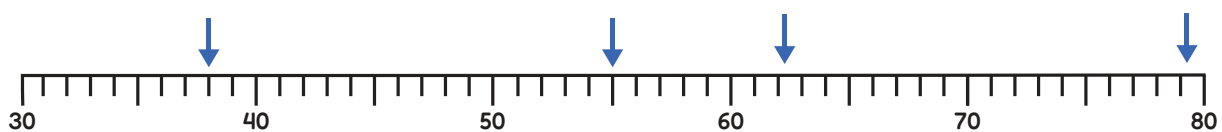

492		
515		
877		

2. Match each number when rounded to the nearest 10. The first one has been done for you.

61	10	33
	20	
	30	
42	40	65
27	50	
	60	85
97	70	
	80	93
76	90	
	100	

Note: A red arrow points from the number 61 to the box containing 60.

3. Which numbers do these arrows show?

4. Now round the numbers in question 3 to the nearest 10.

a. ____ to the nearest 10 is ____

b. ____ to the nearest 10 is ____

c. ____ to the nearest 10 is ____

d. ____ to the nearest 10 is ____

Topic 4

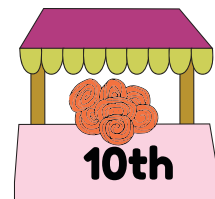

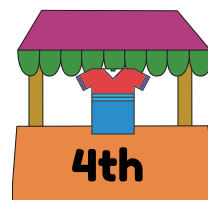

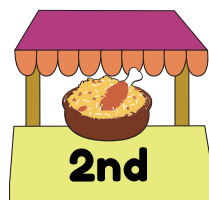

Ordinal Numbers

Adventure Begins!

I'll describe stall items, and you have to guess which stall number (ordinal position) it belongs to.

1. Which stall has colourful clothes hanging beautifully?
2. Which stall has a ring toss game set up?
3. Which stall has Jalebis?

4. What is being sold at the 2nd stall?

Leap and Learn

Bunty and Babloo continue walking. They see more stalls with numbers from 11th to 20th.

They first stop at a stall with pretty paper lanterns. Bunty says, "This is the **11th** stall. We say it as '**eleventh**.'"

Next, they see a stall with many spices. Bunty points and says, "This is the **12th** stall. We call it '**twelfth**.'"

They move to a stall with wooden toys. Bunty explains, "This one is **13th**. It's '**thirteenth**.'"

A stall with colourful kites is next. Bunty tells Babloo, "This is the **14th** stall. We say '**fourteenth**.'"

Numberland Adventures: Up to 999

They then see a stall with stationary items. Bunty says, "Look, this is the **15th** stall. It's '**fifteenth**.'"

A stall with pretty pots is next. Bunty points and says, "This is the **16th** stall. We call it '**sixteenth**.'"

They walk to a stall with nice clothes. Bunty explains, "This one is **17th**. It's '**seventeenth**.'"

A stall with sweet treats catches their eye. Bunty says, "Yum! This is the **18th** stall. We say '**eighteenth**.'"

They then see a stall with shiny jewellery. Bunty tells Babloo, "This is the **19th** stall. It's '**nineteenth**.'"

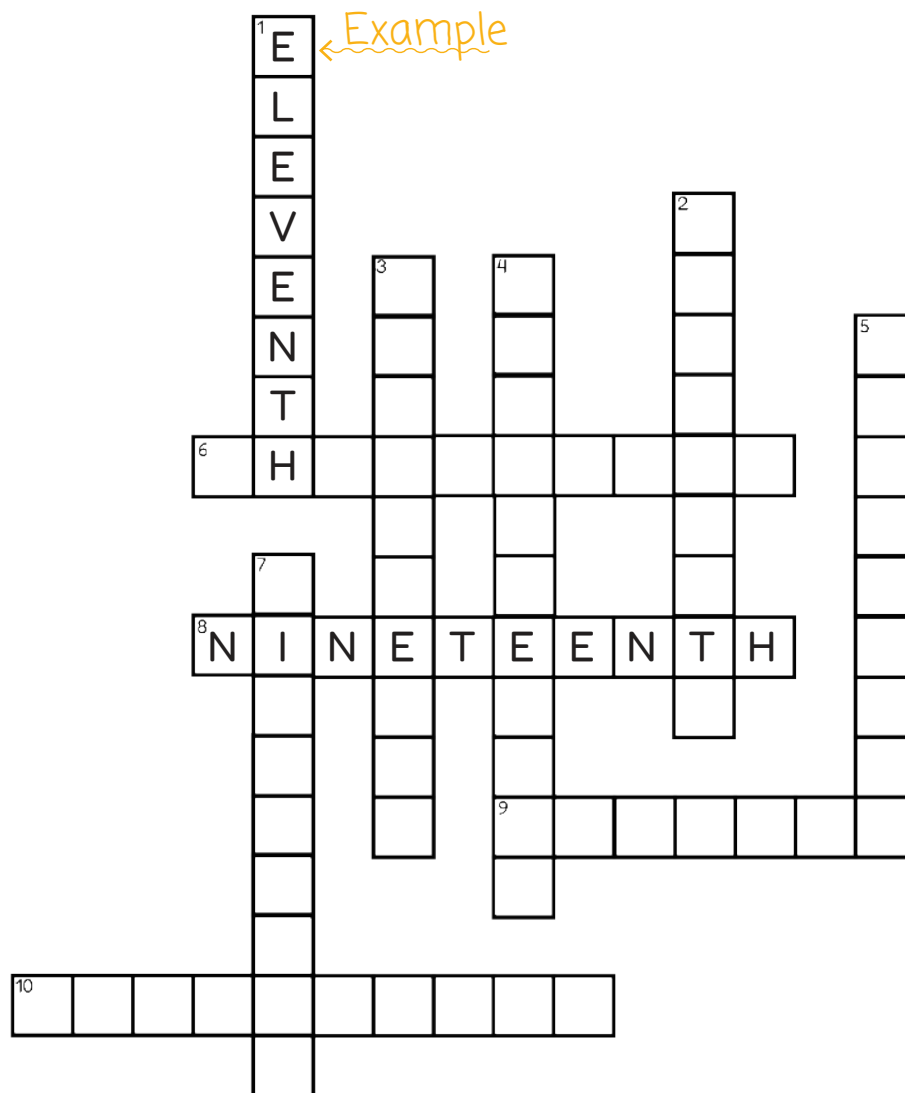

Lastly, they reach a stall with storybooks. Bunty smiles and says, "And this is the **20th** stall. We call it '**twentieth**.'"

Discovery Playground

Pair up and work with your partner to complete this ordinal number crossword puzzle. 

Across

- 6. 13th
- 8. ~~19th~~
- 9. 12th
- 10. 18th

Down

- 1. ~~11th~~
- 2. 20th
- 3. 14th
- 4. 17th
- 5. 16th
- 7. 15th

11th	
19th	
15th	
20th	
17th	

fifteenth	15th	11th	19th
sixteenth	20th	17th	16th
seventeenth	14th	17th	18th
eighteenth	18th	19th	20th

- Colour the fourth, eighteenth and twentieth box red.
- Colour the nineteenth, thirteenth and fourteenth box blue.
- Put a happy face in the first, sixth and sixteenth box.
- Put a red X on the seventeenth and fifteenth box.
- Colour the second, third and fifth box green.
- Put a red + in the seventh and ninth box.
- Put two happy faces in the eight and tenth box.

Numberland Adventures: Up to 999

1				5
11			14	
				20

4. Fill in the blanks with the ordinal number in words.

- Bunty stood in the _____ (12) position in the line.
- The _____ (15) stall had the most delicious sweets.
- Bunty's favourite song was the _____ (18) one played at the fair.
- The _____ (11) book on the shelf is a mystery novel.
- Babloo's kite was the _____ (20) to fly in the sky.

5. Identify the ordinal position of the following letters in ABC.

The first one is done for you.

- H is the eighth letter
- T is the _____ letter
- Q is the _____ letter
- P is the _____ letter
- K is the _____ letter

Topic 5

Roman Numerals

Adventure Begins!

Wow! Look at those numbers on the clock! They're not like the ones we usually use.

1. Have you ever seen a clock like this before?
2. Why do you think this clock has different numbers?
3. Can you recognise any of the symbols on the clock's face?
4. Do you know what this clock is called?

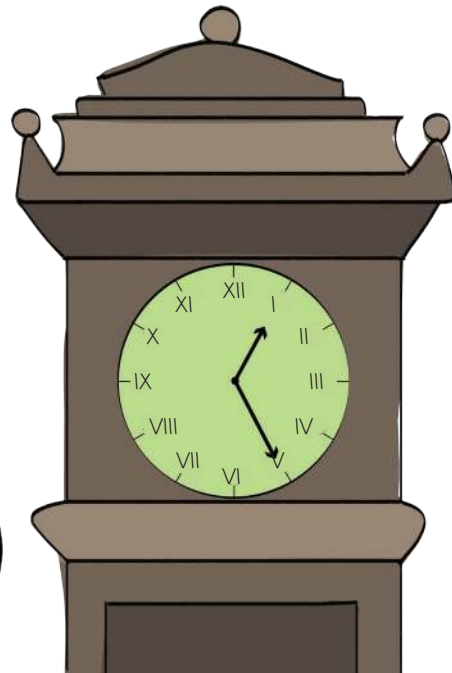

Leap and Learn

Such a clock is called a grandfather clock.

Bunty and Babloo set up the grandfather clock and modern-day clock side by side.

Look closely, Babloo. Our modern clock has numbers from 1 to 12, right?

Yes, but the grandfather clock has symbols instead of numbers.

Roman numerals use symbols instead of regular numbers:

I stands for 1

V stands for 5

X stands for 10

To make other numbers, we combine these symbols:

II = 2 (two ones)

IV = 4 (one before five)

VI = 6 (five and one)

Roman Numerals 1-12		
1	I	One
2	II	Two
3	III	Three
4	IV	Four
5	V	Five
6	VI	Six
7	VII	Seven
8	VIII	Eight
9	IX	Nine
10	X	Ten
11	XI	Eleven
12	XII	Twelve

Practice Questions

Let's change these numbers to the other form.

a. IV = _____

b. 10 = _____

c. 7 = _____

d. XI = _____

Discovery Playground

Roman Numeral Clock

- Your teacher will provide you with a cardboard. Cut a large

circle out of the cardboard to serve as the base for the clock.

- Use toothpicks to make the Roman numbers and glue them on the cardboard.
- Use markers to draw two clock hands on the cardboard.
- Then decorate.

Skill Sharpener

1. Circle the correct Roman numeral for the number 11:
 - a. XI
 - b. IX
 - c. XII
2. Write the following numbers in Roman numerals:
 - a. 3 = _____
 - b. 7 = _____
 - c. 10 = _____
 - d. 12 = _____
3. Bunty wrote the Roman numeral VII on the board. What number did she write?
4. Babloo has X candies. How many candies does he have?
5. Bunty and Babloo played a game where they had to write numbers. Bunty wrote 8, and Babloo wrote VIII. Did they write the same number? (Yes/No)
6. In a book, the chapter number is written as IV. Which chapter number is it?
7. Ammi baked IX pies for a family gathering. How many pies did she bake?

1. In the number 482, which digit is in the tens place?

2. Which of the following numbers is the greatest?

3. The ordinal number for 15 is:

4. Which of the following Roman numerals represents the number 9?

5. The word representation of 87 is:

- 28

6. Which of the following numbers is the smallest?

- A) 654 B) 645
C) 456 D) 465

7. In the number 578, what is the value of the digit 5?

- A) 5 B) 50
C) 500 D) 5000

Fill in the blanks

1. The number before 500 is _____.
2. Seventy-two is written as _____ in numerals.
3. In the number 639, the digit 3 represents _____ tens.
4. 544 rounded to the nearest tens is _____.
5. The Roman numeral for 6 is _____.
6. The number after 998 is _____.
7. The number 745 has _____ hundreds.
8. The number before 450 is _____.
9. The ordinal number for 19 is _____.

Questions

1. Circle the object in the 4th position.

2. Arrange these numbers in ascending order.

312 321 231

3. Arrange the numbers 123, 132, 213, 231, 312, and 321 in descending order.

4. Which object is in the 7th position?

5. Which of these numbers has the digit 5 in the hundreds place?

325 525 357

6. Fill in the blank with $<$, $>$, or $=$.

- a. 245 ____ 241
- b. 879 ____ 798
- c. 654 ____ 534
- d. 924 ____ 924

7. Bunty has 745 marbles, and Babloo has 763 marbles. Who has more marbles?

8. Use the number line to round 294 to the nearest 10.

Connect and Create

Mystery Number Fun

1. Look at the boxes below, and read the clues.
2. Think about the clues with a classmate, and circle the correct number.
3. Did you find all the answers? Well done! Now have some fun, and colour each box to make a colourful pattern.

45 25 10 53 - It is more than 20 - It has 5 in the Ones place - It is less than 30	82 50 23 45 - It is more than 60 - It has 2 in the Ones place	62 31 18 20 - It is less than 24 - It is 5 groups of 4
84 102 408 48 - It is more than 50 - It has 0 in it - When you add 100 to it you get 202	452 952 421 654 - It is greater than 450 - It has 5 in the Tens place - It is greater than 950	127 307 67 142 - It has a 7 in the Ones place - It is greater than 100 - It has a 0 in the Tens place
795 895 995 305 - It has 5 in the Ones place - It is more than 500 - It is 5 less than 1000	199 47 124 109 - It is greater than 100 - It is 1 less than 200	429 381 364 533 - It has a 3 in it - It is greater than 300 - The numbers add up to 12
